SUBJECT: Obtain information on baseline public health resources for Lyon County.

SUMMARY

There are 4 different rural community health offices in Lyon County:

Silver Springs – this office does not have full-time coverage.

Fernley, Dayton, Yerington – these offices have full-time public health services.

These offices provide family planning services, STD clinics, and immunization clinics. Yerington's community health office is the only provider of immunizations in the Smith Valley and Mason Valley region. This office provides an immunization clinic every week. Dayton and Fernley have combined clinics by appointment each week.

The offices also will provide TB services for high-risk patients. These services fluctuate depending on need.

A separate entity, Drug and Alcohol Council, provides drug and alcohol treatment in Yerington, Fernley, Dayton, and Silver Springs.

If a disaster were to happen in Lyon County, the community health offices would play a part in the response to such an event.
